PROGRAMME
4 DAYS! 5 SHOWS!**

#propakafrica2022

Tuesday, 8 March 2022 | NEW PRODUCTS

Time	Topic:	Speaker
10h00	KIEFEL Packaging - Rethinking Solutions for more Sustainable Thermoformed Packaging, made from Plastics and Natural Fibres	Jamil Jorge, Area Sales Manager, Packaging Industry, KIEFEL GmbH
11h00	Digital Packaging Decoration Trends	Uwe Bögl, Owner, Packwise Africa
12h00	Advanced Food Processing Solutions	Stuart Rigby, Global Product and Process Technology Manager, Jet Cook™ Systems.
13h00	EXHIBITOR VIDEO SLOTS	
14h00	Coding, Marking and Quality Control Case studies in the Future.	Sibulele Gambula, Senior Solutions Specialist, J-Pak Johan Engelbrecht Senior Solution Specialist, J-Pak Anley Mahandana, Chief Operations Officer, J-Pak Richard Angus, Chief Financial Officer, J-Pak.
15h00	TBC	

Wednesday, 9 March 2022 | SUSTAINABILITY

Time	Topic:	Speaker
10h00	Adaptive Process Control Plus Motto: Stabilize Process and Reduce Costs	Fareth Djaziri, Sales Director Middle East & Africa, KraussMaffei
11h00	The Food Industry in South Africa: Future Proofing Your Production	Melika Seiderer, General Sales Manager, Ishida South Africa Shawn Van Der Merwe Contracts Manager, Ishida South Africa.
12h00	EXHIBITOR VIDEO SLOTS	
13h00	Renewable Energy and Payment Processes	Oliver Jugadasen, Manager, Commercial Asset Finance Renewable Energy, Standard Bank Louianne Brammage, Manager, Interims Commercial Asset Finance, Standard Bank
15h00	Enviromall's Eco Packaging Offerings	John Fox, Sales Director, Enviromall

Thursday, 10 March 2022 | OCCUPATIONAL HEALTH AND SAFETY

Time	Topic:	Speaker
9h30	Benefits of Occupational Health & Safety – Done Right!	Chris Coetzee, Director and owner, OHSS Consulting
10h15 - 12h00	General Update Discussion on Current EPR Legislation and PRO Strategies	Jane Molony Executive director, Paper Manufacturers Association of South Africa Kishan Singh, CEO of MetPacSA, MD of Global Integrated Business Solutions Junaid Francis, Stakeholder Relationship Manager, PETCO Adri Spangenberg, Executive Director, Polystyrene Packaging Council (Polyco) Francois Marais, Manager, Fibre Circle
12h00 - 14h00	Loadshedding Interruption	
14h30	EXHIBITOR VIDEO SLOTS	

Friday, 11 March 2022 | 'LOCAL IS LEKKER' SOUTH AFRICAN DAY

Time	Topic:	Speaker
9h30	Recycling and Re-Usability of Glass and PET and How CCL Labels/Sleeves Boost Recycling Rates	Marika Knorr, Head of Sustainability and Communications, CCL Label
10h15	Unpacking Printing SA's New Membership Benefits, Services & Latest Industry News	Abisha Katerere, Marketing Manager & B-BBEE Specialist Printing SA Jermaine Naicker KZN Regional Chamber Manager & HR Specialist, Printing SA
11h00	Packaging Education Programmes Offered by IPSA	Kishan Singh, CEO of MetPacSA, MD of Global Integrated Business Solutions
12h00 - 14h30	Loadshedding Interruption	
14h30	Locally Designed and Manufactured Custom Built Machinery for Various Industrial Applications	Andries van Jaarsveld Protective Products
15h15	3D Printing - Applications & Limitations in Packaging Processes	Redemption Bandera, Consulting Engineer, Inpakt

* Program subject to change. The organiser reserves the right to change the program.

CONFERENCES

8 - 9 MARCH

IPSA THINK TANK

Black Eagle Conference Room, Expo Centre Nasrec

Conference sessions start at 10.00am and 2.00pm each day. For bookings: secretary@ipsa.org.za / 011 804 1614
For more information about the conferences go to: www.propakafrika.co.za

#propakafrika2022

NEW PRODUCTS, LIVE DEMONSTRATIONS

VANNPAX

HALL 6 | STAND D31

Vannpax is excited to launch its 1002™ Manual Cartoner with Automatic gluing and closing, and visitors can see this entry level machine in action. Also on display is a Vannpax 1003™ Self-Lock Tray Erector, an Ishida Multi-Head Weigher and a Labelpack label applicator.

GNEUSS

HALL 5 | STAND E21

Gneuss is presenting its new MRSjump extruder that can increase or stabilise the polyester viscosity directly to the desired level. A downstream IV build-up is not necessary. For the first time, the processing of materials with low or highly fluctuating input viscosities is possible in a single extrusion step.

FILKRAFT

HALL 6 | STAND B8

The design of Filkraft's Rotary Piston Filler is revolutionary and the first of its kind in the world. You can learn how the electronically driven pistons replace the archaic cam system that opens up a plethora of new possibilities. The Filler is ideal for filling yoghurt, oils, sauces and any high viscosity product.

ISHIDA SOUTH AFRICA

HALL 6 | STAND B32

Ishida South Africa will have information on its next generation IX-G2 dual energy X-ray inspection system which offers significantly enhanced sensitivities for the detection of low-density and difficult to spot foreign bodies, including bone. The Ishida IX-G2-F incorporates a new line sensor that provides a high-quality X-ray image through an enhanced signal to noise ratio which has increased the ability to detect bone fragments by a factor of four compared with previous X-ray models. This further increases the ability of the machine to identify contaminants, in particular when handling thicker and denser products such as chicken fillets, chicken breasts and a wide range of poultry products

where they can often be overlapped or presented with uneven surfaces.

JK SERVICES & CODING

HALL 6 | STAND C4

JK Services & Coding is exhibiting the latest 5000 series Citronix continuous ink jet (CIJ) printers for applying sell-by-dates and batch numbers. These systems provide highspeed, reliable, non-contact printing onto almost any kind of material. Also to see is the Savema Thermal Transfer Overprinter (TTO), Limitronic High Resolution ink jet printer, Lead Tech laser marking system, the Intermac RED (TIJ) printer, Cassel metal detector and various conveyors.

OMRON

HALL 6 | STAND L15

OMRON is showcasing its fully simulated flexible production environments at Propak Africa and you can see the OMRON TM cobot in action! You will learn how to increase the flexibility, quality and speed of production and also enable companies to respond rapidly to changing market conditions.

HG MOLENAAR

HALL 6 | STAND B22

Molenaar is the supplier, agent and manufacturer of large-scale machinery for food and beverage manufacturers globally. See the Robot on their stand demonstrating Robotic palletizing and de-palletizing. They are presenting their turnkey and greenfield solutions to the food-processing and beverage industries at the show. The emphasis is on the hygienic and efficient processing of liquids, prepared foods and fresh fruit. Also on display is a Linear rinsing machine.

ROBATECH

HALL 6 | STAND D33

Robatech is demonstrating how high-precision adhesive application can conserve resources and

glue packaging neatly and quickly. With their new adhesive application system for primary and secondary packaging, you enter a new dimension in industrial adhesive application.

IRP ENGINEERING PLASTICS HALL 6 | STAND E32

Being a market leader in providing conveyor component and engineering plastics solutions since 1987, IRP Engineering Plastics is showcasing their latest conveyor component solutions using real-life moving conveyor systems.

ROTOCON

HALL 5 | STAND B20 + C20

Featured on Rotocon's stand are live demonstrations of the Ecoline RSH machine for label inspection, slitting, and rewinding and the RDF 340 digital printed label converting and finishing machine. Also presented from the Ecoline portfolio is the Pro Mount plate moulder and the Pro Clean anilox roller cleaner.

ZIBO CONTAINERS

HALL 6 | STAND A11

Zibo Containers are manufacturers of rigid plastic containers for a wide variety of applications predominantly for the food packaging industry. You can view live demonstrations of the versatility of their Italian built tray sealing machines in operation, capable of MAP packing, vacuum skin packing or simply sealing only, all possible by choosing the relevant machine setting.

These are just a few of the new products and live demonstrations that will be on view at Propak Africa and co-located shows. There's so much more to see!

LATEST INNOVATION & NEW TECHNOLOGIES

AIR KNIFE SYSTEMS

HALL 6 | STAND H38

At the Air Knife Systems stand, you can see the IB 1500 Tunnel on display. It is the smallest of their Drying Tunnel range, using a 15KW Blower and VSD with 4 or 5 Air Knives. The IB is suitable for lines with a speed of 5000-20000 units p/h. It's typically used for pre-labelling and data coding. Placement is over the conveyor. Also on display is the Econo DB, typically used on smaller production lines or as a very neat and convenient retro fit to an existing production line, its main purpose is to dry off bottles along the production line.

AKURA ENGINEERING

HALL 6 | STAND L14

Visit the Akura stand to see how easy it is to operate a Bramidan Vertical Baler machine. Efficient compressing of bulky waste materials will dramatically reduce volumes for cheaper storage, handling and transport. Many waste materials may be recovered and recycled, resulting in possible cost recuperation, or even profit, on your disposal program.

ANDERSON ENGINEERING HALL 6 | STAND L17

Anderson Engineering is excited to be part of Propak Africa 2022 where they are showcasing and sharing many of their new innovations and solutions in processing equipment and technology. As a leader in the design and fabrication of high quality customised stainless steel processing equipment, their breadth of experience, equipment and solutions, continues to grow and they look forward to sharing what they are able to offer, from small standard installations to large complex customised solutions.

ARENGO PLASTICS

HALL 6 | STAND J20

Arengo Plastics invites you to their stand to hear about their Rigid PVC Plastic Sheet Extrusion manufacturer of rolls and sheets for thermoforming and printing industries. You will also learn more about custom designed thermoformed and die-cut containers, trays, cartons, tubs, point-of-sale, shrink-wrapping/transport trays, blisters and clamshells for various industries such as hardware, cellular, cosmetics, home care and stationery.

BERNDORF BAND GROUP HALL 6 | STAND L6

Come and visit Berndorf Band Group and their steel belts for the baking and food industry. In these sectors, steel belts are exposed to extreme mechanical and thermal stress. Berndorf Band Group's steel belts are produced to match these high demands and retain their flatness and shape even at fluctuating operating temperatures and a high number of load cycles. Proving to be easy to clean and satisfying the highest sanitary standards at the same time, their premium-quality steel belts fit perfect for the applications of the food and baking industry.

BERRY PACK

HALL 6 | STAND J20

Berry Pack specialises in blister contract packaging and visual retail ready packaging. At Propak Africa they are illustrating different ways of packaging products in keeping with new global trends. Their stand is truly a one stop shop experience – raw materials, printing, corrugates, blisters and contract packaging all on one stand!

BIDVEST AFCOM

HALL 6 | STAND A22

Visit the Bidvest Afcom stand to learn about their latest offerings in the manufacture, distribution and provisioning of innovative packaging and fastening solutions and services, which support their customers in the commerce, mining and agricultural sectors. Over the many decades they have built a reputation for reliability and an after sales service that is of the highest quality.

BMG

HALL 6 | STAND P17

BMG's stand at this year's Propak Africa highlights the company's integrated engineering solutions and technical services that optimise productivity and enhance efficiencies in the packaging and food & beverage sectors. The focal point of this year's exhibit is a display of innovative products and machinery, developed especially for the food and beverage sector, as well as for paper, printing and packaging. Exhibits feature Soliflex, uni UCB modular belts, UltraClean split sprockets and Modsor technology by System Plast amongst others.

BMSC ENGINEERING

HALL 6 | STAND B9

As leaders in metal detection, X-ray, check weigher, vibratory equipment, metal separation with rare earth magnets and diamond sorting equipment, BMSC Engineering is sharing their industry knowledge and insights across this industry sector, and about their Custom Stainless Steel Fabrication which meets the highest sanitary standards.

BOWLER PACKAGING HALL 6 | STAND D8

Bowler Packaging is celebrating 50 years of innovative packaging supply during which time they have mastered all the relevant processing and decorating technologies. For the entrepreneur, they now also feature a dedicated standard products range through their recently acquired one-stop shop subsidiary, Skye Packaging. Talk to them about how to test, try and develop your passion with their support!

CCL LABEL SOUTH AFRICA HALL 6 | STAND D40

A product's decoration might only seem a small part, but it plays a crucial role in making the overall packaging more sustainable. CCL Label has developed labels and sleeves that enable recycling, carbon footprint reduction and reuse. Whether they are bio-based, low-density or made from recycled material – there is a solution for every packaging need. Visit their stand to find out more!

CHIORINO SOUTH AFRICA HALL 6 | STAND P15

In conjunction with the demands of leading OEM's and Multinational end-user customers Chiorino develops a broad range of solutions - including Speciality High-Performance HACCP compliant Food handling conveyor products and the full spectrum of requirements for the sectors of Corrugated Board, Paper, Print & Packaging and Materials Handling.

DYNAMIC PLASTICS HALL 6 | STAND B7

Manufacturers of plastic buckets and containers that are general purpose use, tamper evident with a secure lock and fino plastic buckets and lids, Dynamic Plastics is showcasing its range from 250ml up to 25l.

EBERLE EUROPE HALL 6 | STAND C1

EBERLE, a family run business, located close to Strasbourg, France, manufactures spirally wound paper core production machines, paper straws production lines, paper core recutters and cardboard edge-protector production machines. Visit their stand to be introduced to their latest technologies and development, featuring fast and flexible machines with fully automatic settings and easy changeovers.

FOSTER INTERNATIONAL PACKAGING HALL 6 | STAND A27

Foster International Packaging, known for innovative packaging, is making big strides with the offering of recyclable and sustainable packaging solutions. The company is a division of Close the Loop Group, providing end-to-end solutions for brand owners in packaging and urban mining - with the main aim to create a circular economy. Visit their stand to hear more about these initiatives.

GLUEMORE PACKAGING HALL 6 | STAND K26

Glue-More Packaging is an Accredited Agent and Sole Distributor in Southern Africa for ValcoMelton Hot and Cold glue adhesive application and quality assurance systems for the past 22 years. Visit their stand to hear more about ValcoMelton specialisation in the manufacturing of adhesive dispensing system used for packaging and sealing of items such as corrugated boxes, cartons, books, bags, and pharmaceutical products across the corrugated, packaging, envelope, folding carton, print finishing, nonwovens, tissue/core winding, wood, automotive, product assembly, textile, coating, laminating, and bag manufacturing industries.

H&M ROLLERS HALL 6 | STAND B27

H&M Rollers is a market leader in polymers and specialised engineering services. They encourage you to visit their stand to learn more about their sustainable solutions.

HDM-AUTOMATION HALL 6 | STAND E18 + D32

If you want to know more about vertical & horizontal packaging machines, pre-made pouch bagging machines, single and multi-lane sachet equipment and other industry specialised automation equipment, then visit the HDM Automation stand. The company also provides a wide range of multihead weighers, linear scales, and different type of dosing equipment such as auger filler, volumetric cups, and liquid pump feeders.

HEAT & CONTROL HALL 6 | STAND B31

Innovative size reduction technology from Urschel, a global leader for food cutting technology is on display at the Heat and Control stand. The Urschel Sprint 2[®] Dicer can uniformly dice, strip cut, granulate, or slice a wide variety of meats, vegetables, fruits, and bakery goods. This equipment provides processors a value-added, convenient way to bring their products to market. Also on display will be the CEIA THS/MS21, the world's only multi-spectrum metal detector; the OilSaver Filtration System, which extends the life of frying oil with high efficiency filtration down to 10 microns; the Fastback[®] Horizontal Motion Conveyor 90E which gently transports product by cycling through slow-forward and fast-back horizontal motion; and digital sorting systems from Key Technology which can identify and consistently remove objects based on colour, structure, shape, size at a significantly faster rate than manual inspection.

HOSOKAWA ALPINE HALL 6 | STAND L2

Hosokawa Alpine is an innovative global leader in machine and system engineering based in Augsburg, Germany. They are presenting their blown film lines and film orientation lines which are known for their high economic efficiency and flexibility. The company builds mono-layer and multi-layer blown film lines for 3 – 11-layer blown film.

IGUS HALL 6 | STAND H5

In addition to having new innovative products on display, Igus has the regular stalwarts so many customers can relate to, from low cost automation to energy chains, lubrication free, and low maintenance polymer solutions.

IJP FILLING & LABELLING HALL 6 | STAND D15

IJP is exhibiting the state of the art locally manufactured fully synchronised double head self-adhesive labelling machine that is controlled with OMRON's EtherCAT PLC as well as a variety of filling equipment that is suitable for most of the liquid products in the South African market.

INPAKT GROUP HALL 6 | STAND H9

Inpakt Group is presenting its range of offerings including turnkey services, filling, and packaging machines, after sales support, machine refurbishments, and reselling of international OEM equipment such as LAN Handling Equipment. They are running a competition on their stand with hamper giveaways twice a day as well as gifts and promotional items.

INTERROLL SOUTH AFRICA HALL 6 | STAND G6

At this year's Propak Africa, Interroll South Africa is presenting what made them Best in class with their theme "back to basics". The company is showcasing their Modular Conveyor Platform, their range of Conveyor Rollers and their Dynamic Storage Solutions.

JBT HALL 6 | STAND A3

John Bean Technologies Corporation (JBT) offers a wide range of food and non-food processing solutions, from primary processing to final packaging that includes pre-processing, slicing, washing, mixing, filling, closing, tray sealing,

sterilizing and pasteurizing, postharvest solutions and more. Visit their stand and learn about how they design, manufacture, test and service technologically sophisticated systems and products.

KUBE HALL 6 | STAND K4

Kube Packaging Marking Solutions' is showcasing process and packaging plant equipment, market leading coding and marking track and traceability technology coupled with Oxygen Absorbers.

LABPRINT HALL 5 | STAND G20

Flexographic printers for the pharmaceutical, food and other industries, Labprint specialises in the printing of pharmaceutical blisterfoil, sachet's and stick packs. Visit their stand to hear about their range of products and services; they print up to 4 spot colours, offer in-house artwork and specialise in short runs and a quick turnaround.

LOVELL INDUSTRIES HALL 6 | STAND J20

An FSSC 22000 Accredited Rigid Food Packaging Manufacturer, Lovell Industries is showcasing their range of custom designed thermoformed and die-cut containers, trays, skillets, tubs and clamshells for various food categories such as bakery, deli, fruit, ready meals, frozen foods, desserts, salads, chocolates and biscuits.

MEGADYNE SOUTH AFRICA HALL 6 | STAND H13

Exhibiting at this year's show, Megadyne South Africa is a proud global manufacturer of Megadyne, Challenge, Sampla, AVE and PCS, and proud distributors of Zero-Max, Diamond, Flexco and Vista. The Megadyne Group develops and manufactures thermoset and thermoplastic polyurethane belts, rubber timing and v-belts, pulleys, clamping plates, timing bars and complementary products for a diverse range of applications.

MILLCHEM PACKAGING HALL 6 | STAND G31

Millchem has partnered with industry leaders enabling them to provide customers with standalone equipment, or a complete turnkey solution including processing and packaging lines for all applications. Speak to the experts on their stand and also see the display of the latest Millchem range of consumables, stretch film, adhesives and lubricants to the packaging industry.

MPACT PLASTIC CONTAINERS HALL 6 | STAND B15

Manufacturing and supplying a wide variety of products ranging from materials handling, retail, environmental, jumbo bins and agricultural products, Mpack Plastic Containers applies the circular economy model in everything they do. Visit their stand to learn how customers can return their end-of-life products to them in exchange for new products.

NORDSON SA HALL 6 | STAND J9

Featured at Propak Africa, the ProBlue Flex melter from Nordson is advanced technology that adapts to any operation with ease and simplicity. Depending on your unique requirements, you can choose from factory options direct from Nordson, or smart and simple field upgrades, supported by Nordson's seasoned technical support representatives.

PACKWISE AFRICA HALL 5 | STAND C39

Packwise-Africa presents their innovative machine and tooling solutions for label, flexible and corrugated packaging converters. They are showcasing digital & conventional presses, slitters & diecutters, digital finishing lines, plate mounters, anilox rollers, printing cylinders & sleeves and QC equipment. PLUS listen to their keynote address

'The revolution in digital packaging decoration' on Tuesday 8 March at 11h00 at the seminar theatre.

PROGETTO

HALL 6 | STAND D17

Progetto International is based in Cape Town and specialises in the supply of services and equipment to complete small to turnkey solutions in the materials handling, packaging and process industries. This will be its focus at the show. From here, all projects, machine, automation and control designs are developed, researched and implemented.

RHINE RUHR

HALL 6 | STAND K33

Rhine Ruhr, a specialist equipment supplier of process and packaging solutions, has an IBC Agitator, Lab Agitator and Lab Dispenser on view at their stand. All related to their mixing portfolio. They also have visual displays for powder handling, filling and labelling. Rhine Ruhr looks forward to helping customers convey and dose their solid materials with Idealtec, mix their liquids better with Viscojet, fill more accurately with DeVree, and label more efficiently with Langguth.

SA REPCO

HALL 5 | STAND A9

SArepcO is showing a wide range of narrow web converting equipment such as Mark Andy flexo, digital as well as hybrid printing and converting equipment, Rotoflex inspection, slitting, rewinding and finishing

equipment, GEW UV and LED curing systems, Heaford video flexo plate mounters, Alphasonics anilox roll cleaners, Rhyguan digital finishing and embellishing equipment, Orion flexo plate washers and Unilux LED strobe and inspection systems.

SACMI

HALL 6 | STAND C16

A leader in the African market in rigid packaging technologies, SACMI has three industry-dedicated offices across Africa and further exceptional growth throughout 2021. On the SACMI stand you can see all its latest solutions, from cap, preform and container-making plants to complete bottling and labelling lines

SAFRIQUE

HALL 5 | STAND C3

Safrique International is an export trading company based in Johannesburg and an exclusive distribution agent for local and international manufacturers. At the show, they are presenting cost-saving solutions from virgin to reprocessed plastic polymers as well various additives, recycled and packaging machineries.

SRF FLEXIPAK

HALL 6 | STAND F31

In line with Global Sustainability Initiatives, SRF Flexipak is showcasing a number of developments in the space of High Barrier PET replacement films and other specialised coated PET and BOPP films. These

include Ultra High Barrier Metalised BOPP, High Barrier Clear BOPP, Ultra Low SIT White BOPP

Various coated BOPP options, High Barrier clear PET, White PET, Sealable PET, Matt PET, and Yogurt Lidding film.

STARLINGER

HALL 5 | STAND D28

Starlinger is highlighting the circular economy at their stand through their product and technology.

TECHNOIOLOGY

HALL 6 | STAND L9

TECHNOIOLOGY is an Italian engineering company that specializes in the design and manufacturing of plants for edible oil extraction and refining, oleochemicals, biofuel production and LUBE oil re-refining. The company has 12 representative offices throughout the world and has been active in the industry since 1950, installing over 1400 industrial units worldwide. Visit their stand to learn more about their latest innovation and technologies.

KABRA/ALLSTEIN/RIZBERG

HALL 5 | STAND G3

You are invited to visit their stand to discuss their High Performance Extruders and the latest German Technology Flexo Presses.
